### **Remote Controlled Switch Circuit Diagram**

In this remote controlled switch circuit we are using TV remote to ON/OFF the AC light by pressing any button of remote, and using the TSOP1738 at receiver end. Receiver circuit is connected to AC appliance via Relay, so that we can control the light remotely. We have used IC 4017 to convert it into a push ON, push OFF switch.

### **Turn any IR remote control to a wireless control ON/OFF switch**

Turn Any IR Remote Control to a Wireless Control ON/OFF Switch. circuit for the receiver, then the remote

### **Remote Control Switch - Solidremote Technologies**

Widely used in automobiles, motorcycles, remote engine starter, vehicle door locks, anti-theft alarm and security system, personal alarm, home security system, home electric control, wireless toys, short-to-medium distance wireless remote control products, garage door and gate openers, wireless roller blinds and shutter control, industry automation etc.

### **Remote Circuits - Electronic Circuits and Diagrams ...**

Description. This circuit was designed in response to a request from my reader. What he asked for was a 1KHz IR transmitter circuit for some remote control application. I think this circuit may satisfy him. Any way this circuit can be used where ever a low power IR transmitter of 1 KHz operating frequency is needed.

### **Contactors and Control Circuits - claydons.org**

2. Common relay/ Contactor set-up (utilising an emergency stop circuit) fig1. The contactor is operated by the control circuit energizing a coil, which can
